

Quality and Logistics Engineer (50%)

We are looking to strengthen our quality team for our new product PeriSafe that enables more dialysis patients to be treated at home. We are looking for a strong, motivated candidate who shares our vision to bring patients home...

Life at Peripal - meaningful work:

Peripal AG is an ETH start-up based in Zurich developing medical devices to facilitate dialysis. Home Care is paramount to manage costs and productivity in the future of healthcare.

Peripal AG develops and markets products that make home care safer and simpler, benefits privacy and independence, and reduce dialysis-related healthcare costs. Our company's first product solves the most problematic therapy step in home peritoneal dialysis: a manual connection of tubings that bears the risk of infection, especially for elderly and frail patients. PeriSafe is a connection device that addresses these issues and allows more patients to be treated at home, where they belong.

Our startup was awarded the deVigier Prize, the Swiss Innovation price, the CS Private Investor Price, and the Prix Strategis Public price. PeriSafe has received market authorization (CE mark) and the company closed a Series B funding in order to accelerate market entry and growth.

About the role:

The Quality and Logistics Engineer will cover two important aspects in an emerging medical-device company: support of quality activities and managing logistics/supply chain. As a manufacturer of medical devices in a highly regulated environment, Peripal AG obtained the ISO 13485 and the EC certificates for its products about two years ago. In order to sustain the high-quality standards of its products, the Quality and Logistics Engineer takes over duties and responsibilities in the following topics:

- **Quality:** Supporting activities in the company and taking over responsibilities for technical/engineering focused tasks, like handling product issues, assessing changes, performing tests, and doing data analysis. A crucial portion of the job bears the necessity of documenting all activities which is required for regulatory purposes or in case of audits.
- **Logistics and Operations:** The focus lies in production planning together with contracted suppliers and order processing, but also in the maintenance of supplier relations and to take care of supplier issues.

What you will be doing:

- Managing risk assessments of product and processes.
- Leading role in product-release activities of sterile and non-sterile products.
- Responsible for change management and documentation system.
- Author of quality and manufacturing related procedures for internal and external use.
- Handling of product non-conformities and customer complaints. Technical investigation, root-cause analysis, and problem resolution. Escalation to the CAPA process, where necessary.
- Support in internal and external audits.
- Planning manufacturing forecast (together with Finance and Sales) and organizing the implementation at external suppliers.
- Administrative processing of customer and purchase orders. Organizing logistics for deliveries and managing inventory.
- Responsible for Supply Chain management.

Requirements for this job:

- 3+ years of work experience in the area of Quality in a MedTech or similarly regulated company.
- 3+ years of work experience in Logistics/Operations in industry. Experience with sterile and injection-molded products desirable.
- Completed education as Specialist at Höhere Fachschule (HIF) or Bachelor degree in engineering or technical sciences at Fachhochschule (FH).
- Knowledge of ISO requirements.
- Ability to work independently and make decisions.
- Critical but pragmatic thinking and problem-solving skills.
- Outstanding communication skills and experience in working with suppliers and customers.
- Advanced proficiency in German and English in written and spoken language.

We are looking for an experienced, hands-on individual with an entrepreneurial mentality who will thrive in a fast-changing start-up environment. If you have worked in a similar role in healthcare or medtech, if you are a self-driven personality, and if you would like to embark on an exciting journey with a dedicated start-up team, then this might be the job for you!

We would appreciate it if serious candidates send their CV and motivation letter directly to our HR Manager at: **info@peripal.com**

Please note, we do not accept applications from recruiting agencies.
